# SPIRITUAL KIT

To burn the diya, place the wick the other way and the smoke emitted is a good air purifier, mosquito repellent and generates oxygen. Also, the ashes remaining after the diya is burnt can be used to control fungicides.

## HAVAN CUPS

Havan Cups are Made using Desi cow dung as base, used essential oils and natural resins for fragrance. Our products are sustainable, eco friendly, and the remains after use are not only biodegradable but can also be used as fertilizer for plants

## DIYA

## INCENSE CONES

## Customizable Fragrances

Charcoal-free

Charcoal-free agarbatti is made using a blend of natural ingredients such as powdered herbs, flowers, wood, and essential oils. These materials are mixed with natural binding agents and then hand-rolled onto bamboo sticks, creating fragrant and non-toxic incense sticks.

## INCENSE STICK

# TORAN KIT

Customizable Fragrances

Charcoal-free

Natural ingredients  
Eco-friendly incense sticks are made from natural ingredients like flowers, and they don't contain synthetic additives or harmful chemicals

DIYA

# TRUE ELEMENT KIT

Customizable Fragrances The basic

ingredients of an incense stick are bamboo sticks, paste (generally made of charcoal powder or wood powder and joss/jiggit/gum/tabu powder - an adhesive made from the bark of litseaglutinosa and other trees), and the perfume ingredients - which traditionally would be a powder of mixed ground ingredients

Havan Cups are Made using Desi cow dung as base, used essential oils and natural resins for fragrance. Our products are sustainable, eco friendly, and the remains after use are not only biodegradable but can also be used as fertilizer for plants
